## **DETAILED ACTION**

### ***Examiners Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiners amendment was given in a telephone interview with David Bilodeau (Reg. No. 42,325) on April 22, 2008.

Claim 1, line 8, "(c) selectively enlarging said converted macro blocks and macro blocks that have not been converted using the inverse discrete cosine transform" has been changed to "(c) selectively using the inverse discrete cosine transform to enlarge said converted macro blocks and macro blocks that have not been converted".

Claim 10, line 10, "enlarging means for selectively enlarging said macro blocks received from said converting means and macro blocks that have not been converted using the inverse discrete cosine transform" has been changed to "enlarging means for selectively using the inverse discrete cosine transform to enlarge said macro blocks received from said converting means and macro blocks that have not been converted".

Claim 19, line 8, "(c) means for selectively enlarging said converted macro blocks and macro blocks that have not been converted using the inverse discrete cosine transform" has been changed to "(c) means for selectively using the inverse discrete cosine transform to enlarge said converted macro blocks and macro blocks that have not been converted".

***Allowable Subject Matter***

1. Claims 1-3, 6-12 and 15-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 10 and 19 are allowable over the prior art of record because none of the prior art of record teaches the combined claimed elements as set forth in the claim 1, 10 and 19.

None of the prior art of record teaches or fairly suggests that image processing method for resizing an image using an inverse discrete cosine transform that selectively converting the encoding type of said macro blocks so that the encoding type of said macro blocks coincides with the encoding type of said original source image, only if the checked two encoding types are different; and selectively using the inverse discrete cosine transform to enlarge said converted macro blocks and macro blocks that have not been converted and together with combination of other claimed elements as set

forth in the independent claims 1 and 10. Therefore, the claim 1 and 10 are over the prior art of records.

Claims 2, 3, 6-9, 11, 12, 15-18 are allowed because they are depended on independent claims 1 and 10.

Any comments considered necessary by applicant must be submitted no later than payment of the issue fee and, to avoid processing delay, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance."
